

TIMS Entry-Level Implementation

TIMS Entry-Level implementation for the Technology Infrastructure Management Console

Entry-Level TIMS Implementation - Remote TIMC support for:

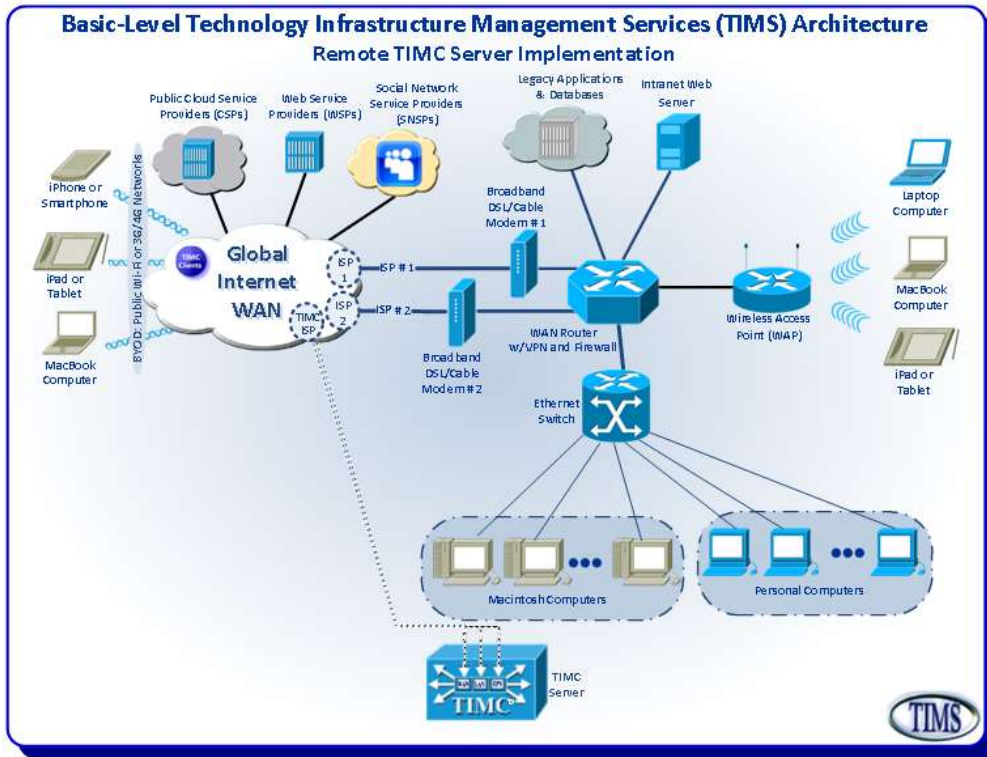

- WAN router including integrated VPN and firewall.
- Cloud Service Providers (CSPs), Web Service Providers (WSPs), and Social Network Services Providers (SNSPs).

Implementation and Recurring Costs:

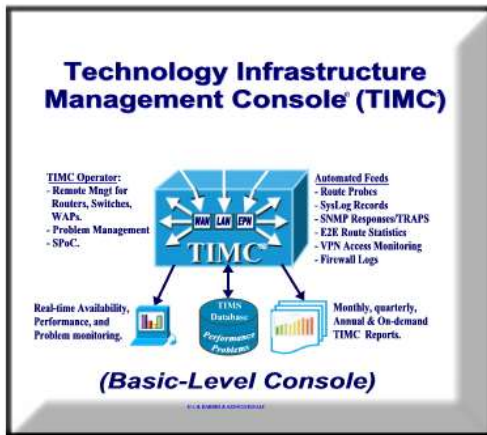

- Implementation Cost: None. *(If customer already has Small Business Router with Integrated VPN and Firewall support.)*
- Recurring Costs: \$99/Month for continuous, 24/7 monitoring of WAN Router and up to three Global Internet WAN Connections to CSPs, WSPs, and SNSPs.

Technology Infrastructure Management (TIMS)

TIMS Basic-Level Implementation

TIMS Basic-Level implementation for the Technology Infrastructure Management Console

Basic-Level TIMS Implementation - Remote TIMC support for:

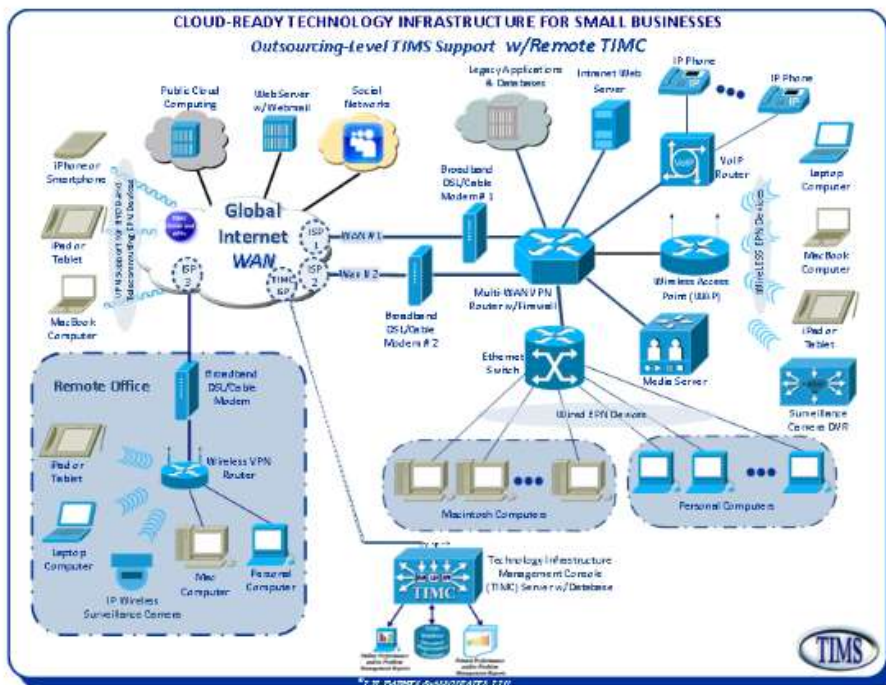

- WAN router including integrated VPN and firewall.
- Cloud Service Providers (CSPs), Web Service Providers (WSPs), and Social Network Services Providers (SNSP).
- Managed Ethernet Switches.
- Wireless Access Points (WAPS).
- Legacy Application and Database Servers.
- Intranet Web Server.
- LAN-attached End-Point Networking (EPN) Devices.

Implementation and Recurring Costs:

- Implementation Cost: None. (If customer already has Small Business Router with Integrated VPN and Firewall support.)
- Recurring Costs: \$199/Month for continuous, 24/7 monitoring of WAN Router and up to five Global Internet WAN Connections to CSPs, WSPs, and SNSPs.

Technology Infrastructure Management (TIMS)

TIMS Enterprise Outsourcing-Level Implementation

TIMS Enterprise-Level implementation for the Technology Infrastructure Management Console

Outsourcing-Level Technology Infrastructure Management - includes 24/7 support for Global Internet WAN, Local Area Network (LAN), and End-Point Networking (EPN) devices.:

- WAN router including integrated VPN and firewall.
- Cloud Service Providers (CSPs), Web Service Providers (WSPs), and Social Network Services Providers (SNSP).
- Managed Ethernet Switches.
- Wireless Access Points (WAPs).
- End-Point Networking (EPN) devices including PCs, MACs, Tablets, and Smartphones.
- TCP/IP-based Legacy Application and Database Servers.
- Intranet Web Server.
- VPN Support for Telecommuting and Work-from-Home Employees..
- Gateway VPN Support Remote/Branch Offices.
- QoS and VLAN support for VoIP Routers and IP Phones.
- Media Servers.
- CCTV and/or IP-based Surveillance Camera Systems.
- TIMS Inventory Database.

Implementation and Recurring Outsourcing Costs:

- Implementation Cost: \$199. (If customer already has Small Business Router with Integrated VPN and Firewall support.)
- Recurring Outsourcing Costs: \$299/Month for LAN and EPN devices, and 24/7 monitoring of above components, and up to five Global Internet WAN Connections to CSPs, WSPs, and SNSPs.
